

I wanted to stop and take a minute to write a testimonial of my incredible experience with you at Doulos. I want you to understand just **what kind of support you can expect from Doulos PM Training, Gary in particular**. The training was intense (with emphasis on intense) but it is manageable even with a fulltime job and family. Gary is experienced, supportive, patient and understanding. The class was excellent, well worth the investment and although I have experience as a project manager Gary brought a lot of knowledge to the table that I will carry with me. There was a 'glitch' on the day I was scheduled to sit for my exam and Gary, supportive as always had contacts at PMI for me which helped me get the situation resolved as quickly as possible.

I strongly recommend you consider this class prior to sitting for the exam regardless of the number of years of project management experience you have.

Best of luck although you won't need luck if you follow the plan and heed Gary's recommendations.
